Peter Hua

peter.s.hua@gmail.com | Vancouver, Canada

Skills

Tools: TypeScript/JavaScript, Node/React, Ruby, Python, SQL, Docker, AWS, New Relic
Databases: MySQL, PostgreSQL, SQL Server, Redshift, DynamoDB

Experience

Backend Developer, Commerce7 – Vancouver, BC Jan 2024 – Present

- Led product goal of API latency reduction; decreasing 99th percentile response times 25% across platform serving 27M requests/day; mentored and delegated query optimizations to 2 engineers
- Led triage and resolution for incidents; resolved critical incidents such as memory leak, concurrency failure modes
- Developed features for e-commerce processing $11M/day, including custom tax calculation engine, external tax API integration, and Stripe Elements integration
- Responsible for reporting Redshift cluster and resolved query bottlenecks (50% reduction)
- Designed SSO login flows with Microsoft Entra for 7,000 users
- Designed cloud architecture for automated daily reporting emails for 3000 tenants
- Responsible for e-commerce order syncing architecture and tuning throughput (45k orders/day)
- Conducted backend engineering interviews for the product team (20+)

Software Developer, Tinker – Remote 2022 – 2023

- Led team of 3 software developers; designed cloud architecture for a web based database table editor
- Built CLI to automate backend provisioning (web server, database, API layer) via Docker, reduced deployment manual steps from 180 to 9; automated TLS certificates and DNS records
- Configured cloud infrastructure: Load balancer, NGINX, firewalls, VPC

Senior Control Engineer, Birket Engineering – USA, Japan, China 2017 – 2021

- Led team of 3 control engineers for greenfield software/hardware projects from concept to deployment of Universal Studios intellectual properties (Sing, Kung Fu Panda, Harry Potter) with 44,000 guests/day
- Embedded on customer sites for 2 years as the technical lead to integrate technology across 10 teams
- Designed API interfaces for audio/video, lighting, animated figures, special effects
- Created software/hardware user interfaces in collaboration with operations team
- Responsible during opening week for triaging and resolving incidents, leading operations and maintenance teams
- Deployed and configured on-premise infrastructure: Server racks, VMs, network switches, hardware I/O, databases

Electrical Engineer, E2 Consulting – Alberta 2012 – 2017

- Earned professional engineer license and project lead in charge of design, electrical analysis, budget, schedule; collaborated with mechanical/process engineers, 3rd party vendors

Education

University of British Columbia – BASc Electrical Engineering with Distinction 2012
